

Iasaldo Batista

Junior Backend Developer

portfolio-iyosaldo.vercel.app

I turn workflow rules into backend paths: shifts become schedules, messages become moderation queues, and posts become predictable REST records. My projects share the same pattern: validate input, apply business rules, store data, and document how another developer can run the app. I am ready for junior API work: endpoints, bug fixes, integrations, database queries, and setup notes.

TECHNICAL SKILLS

Backend: Node.js, Express.js, REST APIs, CRUD, JWT Authentication, RBAC
Databases: PostgreSQL, MySQL, MongoDB, SQL, Data Modeling
API work: Request validation, error handling, API documentation, environment setup
Tools: Git, GitHub, Postman, Render, Vercel, VS Code, Basic CI/CD
Frontend collaboration: Next.js, React, HTML5, CSS3

SELECTED BACKEND PROJECTS

ShiftSync - Shift Management System	2026
Next.js, Node.js, Express, PostgreSQL, JWT, Role-Based Access	
- Built the API and interface flow for restaurant shifts, absences, team operations, and shift swaps. - Mapped scheduling rules into endpoints, PostgreSQL records, and role-based actions. - Deployed a live prototype and kept the project readable for future tests and API docs.	
Portfolio & Feedback Management System	2025
Node.js, Express, Next.js, PostgreSQL, Vercel, Render	
- Created the backend path for feedback submission, message storage, and private admin moderation. - Connected a Next.js portfolio frontend to a Node.js/Express API and PostgreSQL persistence. - Separated frontend and backend deployment while keeping the project easy to present and inspect.	
Quick-Post API	2024
Node.js, Express, REST API, Layered Architecture	
- Created CRUD endpoints for post records and basic content management flows. - Separated request handling, business rules, and data access into controller/service/repository layers. - Left a clear path for authentication, automated tests, and public endpoint documentation.	

EDUCATION

Backend Engineer Career Path, Codecademy	2024 - Present
Node.js, Express, REST APIs, databases, authentication, and software architecture patterns.	
IT Technical Course, IFAC	2021 - 2023
Programming logic, algorithms, operating systems, and computer networking.	
Secondary Education - Science and Technology	2018 - 2020
National High School of Sao Tome.	

LANGUAGES

Portuguese: Native
English: Intermediate / technical reading and professional writing
